OEM

Pressure transmitter
Relative -1 ... 600 bar
Absolute 0 ... 25 bar

EDITION 07/2004

Technical overview

These compact OEM pressure transmitters type series 511 meet the highest specification for mechanical stress, EMC compatibility, and operational reliability, which means that this range is particularly suitable for all demanding industrial applications.

This sensor utilises a ceramic technology, developed by Huba Control and for the last 10 years, in millions of applications, used in combination with unique integrated electronic design, means that the type 511 series has a high degree of accuracy for all temperature ranges. These units are available in small or production quantities, with an excellent price to performance ratio.
